

VILLA RAVELLO

 Saint Peter, Barbados

Villa Ravello is an outstanding four-bedroom property with modern architecture surrounded by tropically landscaped gardens. Built on a design conceptualized by Architects Cubed, Villa Ravello boasts a striking mix of contemporary and Caribbean style that takes full advantage of the 27,000 sq ft of prime, ridge front land offering panoramic views of the Caribbean Sea.

The villa offers 3 bedrooms in the main house with an additional fully self-contained one bedroom cottage. The villa was built in 2012 – 2013 and the majority of the high quality fixtures, fittings and furnishings were sourced directly from Italy.

Villa Ravello has been professionally landscaped and features a variety of tropical blooms. There is a 25,000 gallon water tank that catches rain water for use in irrigation throughout the gardens. One of the nicest features of this property is the stunning seaview and this can be enjoyed from the salt water swimming pool that is conveniently located off of the patio of the main villa.

Villa Ravello is well situated just 3 kilometers from the Coastline where there is easy access to the Beach Club at Port St Charles and a number of Restaurants including “The Fish Pot”. All other amenities can be found in Speightstown which is located just 3.5 kilometers from the property.
