

BARBAREES HILL MAIN ROAD

 Saint Michael, Barbados

This two story 5,600 sq. ft. property is approved for both commercial and residential and is ideally located on the main road between Eagle Hall and Bridgetown.

At present the 2,800 sq. ft. upstairs is an attractively finished 6 bedroom 4 bathroom (2 of which have to be completed) open plan home .

The ample size, appealing and well laid out kitchen has an island with a breakfast counter top that looks out onto the dining and living areas with an adjacent covered and secure verandah.

They are two sitting areas, one at each end with the dining area separating them both. Both of the sitting areas lead out onto covered verandahs. One looks over the front of the house and the other to the back.

From the wrap around front verandah they are a flight of stairs that takes you up to an open deck with a large attic that even though not completed has the wiring and plumbing already installed.

On one side of the upstairs residence there is the en-suite master bedroom with a walk-in closet. (However, this bathroom has to be completed) On that same side there are another two bedrooms that share a completed modern bathroom. On another side of the residence are three additional bedrooms of which one is en-suite, the other two share a bathroom (this is the other one that has not yet been finished.)

The additional 2,800 sq. ft. downstairs is laid out like upstairs in regard to how the rooms are divided. The walls are finished in trowel plastic and the floors painted in grey floor and patio paint.

An advantage to this property is that there is ample parking space available to the front and side of the building.
